Takeuchi's TB350R, TB300 Series, compact excavator features the latest technology and a short tail swing design that makes it ideal for working in tight or confined spaces. Inside the cab, a seven-inch, multifunction color monitor with touch screen places a wide range of functions at the operator's fingertips. A dedicated coupler circuit allows for the quick and easy exchange of various hydraulically driven attachments when used with an optional hydraulic coupler. A jog dial with one-touch controls lets operators easily control throttle position and multiple machine functions. The TB350R also offers a dig depth of 3,575 mm, maximum reach of 6,065 mm and maximum dump height of 3,945 mm. Combine those working ranges with its high-flow primary auxiliary circuit, and the TB350R is ideal for multiple applications, including demolition, land/vegetation management, general contracting, landscaping, hardscaping, rental, residential, and commercial construction.
